

Birth Time Correction

Cemal Cicek

19 January 2019

Preface:

To correct a birth time, we have two techniques in the microastrology.

1. Technique:

If we have birth time and/or a death-time from another family member, we can compare the suns and correct the birth time and control birth time with progressions and returns.

I have shown in my work "Microastrology" and "The exact time of death and birth time correction" with the examples how to correct birth time with sun-comparing method. In the work "Microastrology" old progression keys (one tropical day = one tropical year) were used, which was wrong.

2. Technique :

Unless we know of any other birth time in the family, we can control and correct the birth time with the events.

First of all, it is very important to know how correct is the birth time that to be corrected. If someone is claimed to have more than one birth time, one must first determine what time is right. If you can not control the birth time whether it is right or not, you can do not correct the birth time.

We must first check the birth time before we correct if the given time is reasonably correct. It's not true when someone says you have to have many events to correct a birth time.

You do not need many events for that but just two, one for control and another for confirmation. For us not the many events but exact events are important. We only use the planets and planetary axes that we can assign to the event.

The second most important is where and which harmonic we should use. The birth time that is given and the event time we are examining decide which harmonic and which progression to use.

1-If we have minutes exactly (+/- 4 minutes correct) birth time and minute accurate event time, we can use any progression / returns up to harmonic 4096.

2-If we have minutes exactly birth time but from the event only the day is known, we can use returns with all harmonics, but the progressions only up to 256 harmonic.

3-If the birth time is rounded up to quarter of an hour and from the event only the day is known, we should use only up to 256 harmonic with all progressions and returns.

The rule is more exact birth time and event time the higher harmonics we can use.

4-How do we investigate if two different birth times are claimed for one person?:

a-If the information differs only 4-5 minutes, we use harmonic 4096

b-If the details differ by one hour, we use harmonic 256 and 1024.

c-If the information differs several hours / days / years, we use harmonic 16 and 64.

We do not have to control all 2^n harmonics.

If we only control harmonic 16,64,256,1024 and 4096 depending on birth time and event time, we would also have controlled other intermediate harmonics.

It's not true if someone says you can not prove the correction if it's true or not. You can prove a birth time correction that is correct if you have universally valid rules.

The events to be used in the birth time correction:

a-Marriage and divorce

b-Birth and death

We also take the birth of the mother and father because we can go back in time.

c- The axes:

Marriage : ♀/♂, ☉/♂, ☉/♀

The divorce (separation): ♀/♄, ♄/♂

Death: ♂/☿

Husband : ♀ and DC Lord

Wife : ☽, ♀ and DC Lord

The mother : ☽, ♀, ☽/♂, MC/☽, MC/♂, MC/♀

The birth (when we examine the birth of the wife, husband, father and mother):

☽/♄, ☽/♂, ♂/♄

The birth of the child :

aa-male: ☽/♄, ☽/♂, ♂/♄, ☽/♀, ♀/♂, ♂/♂, ♀/♂

bb-female: ☽/♄, ☽/♂, ♂/♄, ☽/♀, ♀/♂, ♀/♂, ♀/♀

Used :

1-Sidereal zodiac, Krishnamurti Ayanamsa.

Ayanamsa 23°45'56" for Year 2000. Speed of precession is 50.2388475.

2-Progressions Keys :

Tertiary I: 1 sidereal day = 1 sidereal month

Tertiary II (Minor) : 1 sidereal month = 1 sidereal year

Secondary Progression : 1 sidereal day = 1 sidereal year

I take as Lord:

♈	♉	♊	♋	♌	♍	♎	♏	♐	♑	♒	♓
♂	♀	♀	♂	♂	♀	♀	♂	♂	♀	♀	♂

The rulers, with whom **after my research** I am 100% sure, marked red. It is another but also very important field of research for astrology.

Zet Settings :

a sidereal day (23h 56m 4.091s)

a sidereal month (27d 7h 43m 11.47s)

a sidereal year (365d 6h 9m 9.5s)

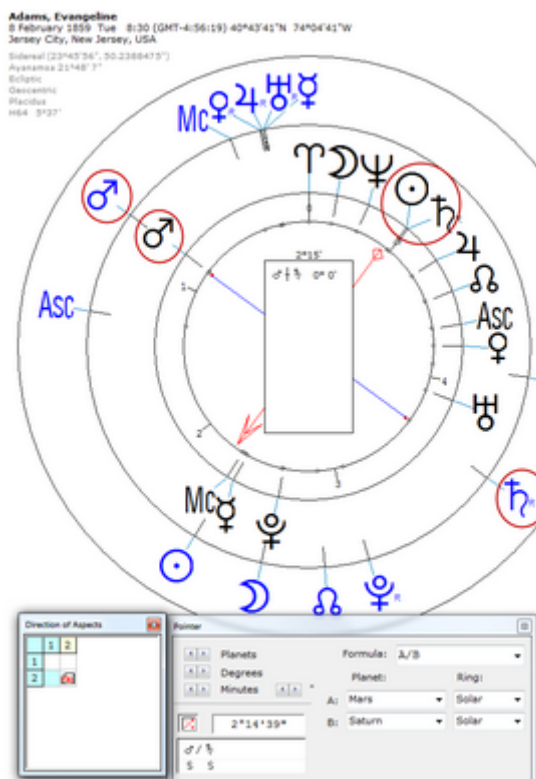

Rules for birth time control and correction:

Rule 1- The planets that have to do with the event must form harmonics in returns and in progressions with each other and / or with the natal positions. The higher the harmonic they must be more exact .

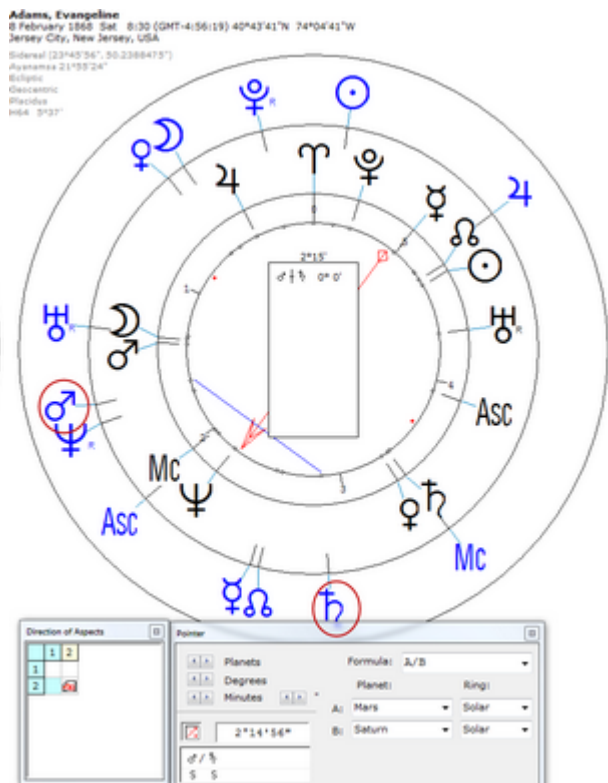

When Evangeline Adams had died, secondary converse Mars with natal Mars and with secondary converse Saturn exact, if the birth dates were 8 February 1859 at 08:30 AM.

Solar Return (Harmonic 16)

Birth time 02:30 AM

Birth time 07:56 PM

	Birth time 02:30 AM	Birth time 07:56 PM
Solar ♀ = ♀	= Natal ☉	= -

Solar ♀ = 10° 43' 14''

Solar ♀ = 16° 22' 55'' - 05° 37' 30'' = 10° 45' 25''

Natal ☉ = 21° 58' 37'' - 11° 15' 00'' = 10° 43' 37''

Solar Venus and Neptune show the divorce and are exact with natal sun. That's why 2:30 AM birth time is right.

² https://www.imdb.com/name/nm0000072/bio?ref_=nm_ov_bio_sm

Rule 2- If the same place is activated in different progression and / or returns with the planets that have to do with the event , there is a sign that the birth time is right.

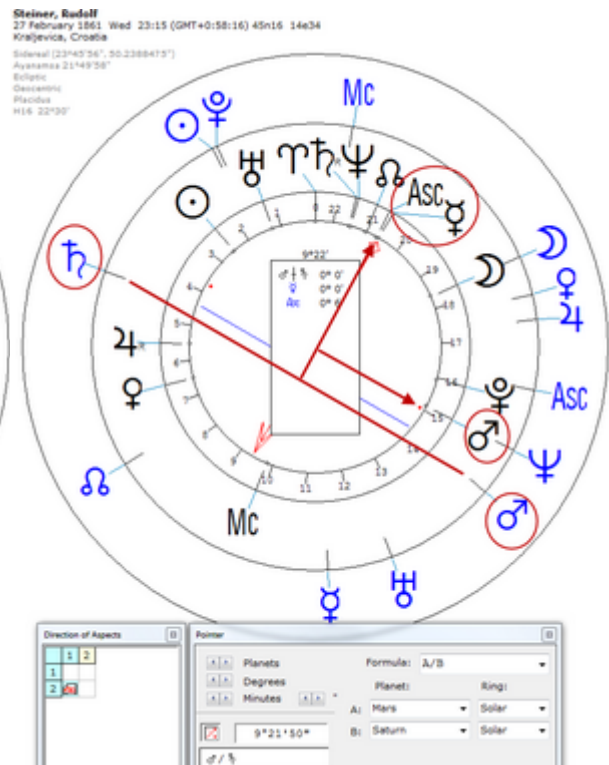

e.g. When Marie Steiner, Rudolf Steiner's wife died, lunar MA / SA and Progressed Lunar MA / SA were exactly the same place, namely on Natal AC-DC axis and on Natal DC Lord Mars, if Rudolf Steiner's birthday would be February 27.

Harmonic 16

Lunar Return

Progressed Lunar Return

$$\text{Lunar } \text{♂} / \text{♂} = 20^\circ 37' 20'' - 11^\circ 15' 00'' = 9^\circ 22' 20''$$

$$\text{Progressed Lunar } \text{♂} / \text{♂} = 9^\circ 21' 50''$$

Difference is 30''.

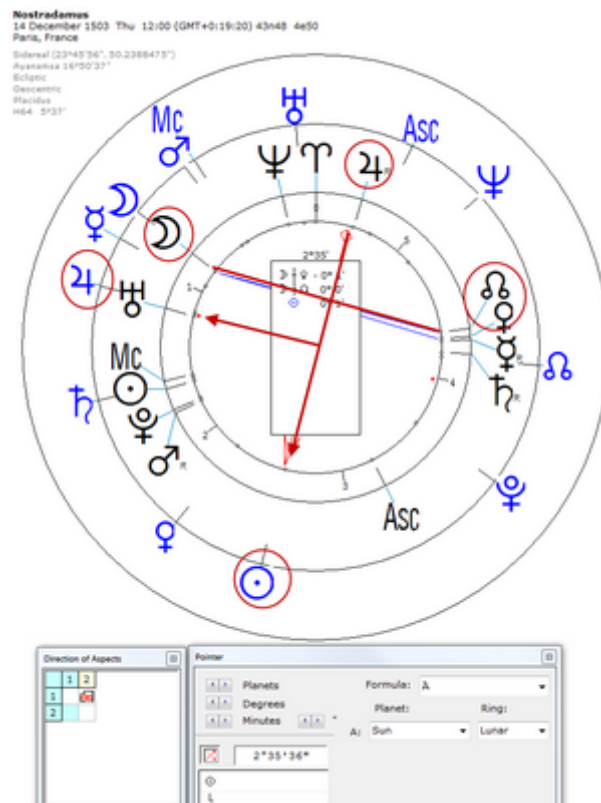

Difference for the birthday 25 February would be 1' 42'' , AC-DC axis and Natal DC Lord would not be activated.

As a second example is Nostradamus.

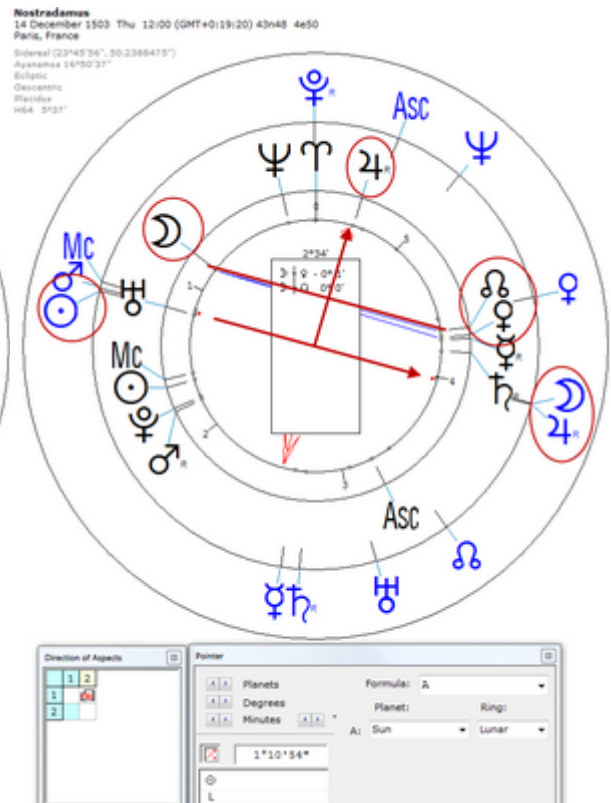

On November 26, 1547 he married his second wife, the Saloner widow Anne Ponsarde.³.

Rule 3- All the planets involved in the event must clearly show the event.

⁵ https://www.astro.com/astro-databank/Brown,_Gordon

⁶ https://www.astro.com/astro-databank/Brown,_John_Macauley

Rule 4- If the planets that have to do with the event are mutually harmonic with their natal position, it is also a sign that the birth time is the right one. Here (left) is married as Clinton, were transit sun with natal venus and transit Venus with natal sun exactly.

And (right) when Kate Middleton's grandfather ⁷ died on September 10, 2003 Kate Middleton had lunar SU = natal UR, lunar UR = natal SU, if she had birth time at 23:33.

Bill Clinton	Birth Time 8:51	Kate Middleton	Birth Time 23:33
Transit ♂	= Natal ♀	Lunar ♂	= Natal ♂
Transit ♀	= Natal ♂	Lunar ♀	= Natal ♀

Rule 5- If some Progressions or Returns do not show the event clearly, the time of birth is not correct. It may happen that the controlled time with the correct birth time is harmonic. What I mean here, I would like to explain with an example.

For example, if we take Diana's marriage-time as a natal and check her death. We will see that natal (marriage) shows the death because marriage time is harmonic with the birth time.

Another example:

Assuming we know the birth time (3 °00'00'') and let us take the time that the sun is 5 ° 48' 45 '' with the natal sun have exactly 2 ° 48 '45' '' difference .The wrong time with the Sun 5° 48'45'' will also show in some Progressions and Returns as if correct. Therefore, all Progressions and Returns have to show the event and that can only correct birth time.

The control of birth times :

Cosby, Bill⁸

1-In September 2014 a new, well researched, biography by Mark Whitacker has the birth time of 3 pm

2-Biography: Ronald L. Smith "Cosby," 1988, p.1, gives 3:00 AM.

3-Amir Bey quoted him for 0.30 am in American Astrology 9/1993.

We have three possible birth times for Bill Cosby.

As a first event we take the marriage of Bill Cosby.

"Cosby married Camille Hanks on January 25, 1964."

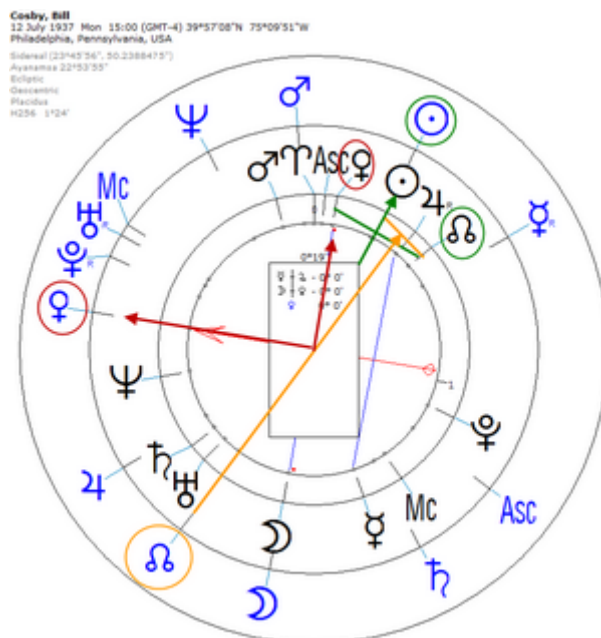

The most important planets in marriage are the Sun, Venus, Node, AC and DC Lords. We need to focus our attention on these three planets. These three planets will form planetary pictures with each other and / or with their natal location exact harmonics.

Which of these birth times fulfills this requirement is the correct birth time.

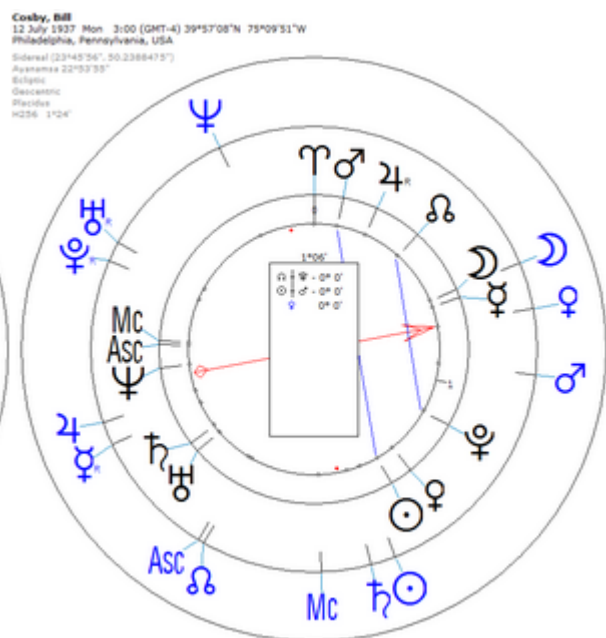

We use harmonic 256 here because the two birth times differ from each other for 12 hours. If difference was small, e.g. 5 minutes, then we would have to use harmonic 4096.

Lunar Return for January 25, 1964

Lunar ☉	= Natal ♀ / ♀	= Natal MC / ♀
Lunar ♀	= Natal ☉ / ♀	= Natal AC / ☉

As you can see here, our preconditions are with the birth time 15:00 perfect fulfilled, the planets that have to do with the marriage have been activated and to form exact harmonics.

Here are the most important for 15:00 birth time:

first, that Lunar Venus is her natal place very exactly harmonic (difference 18 "),

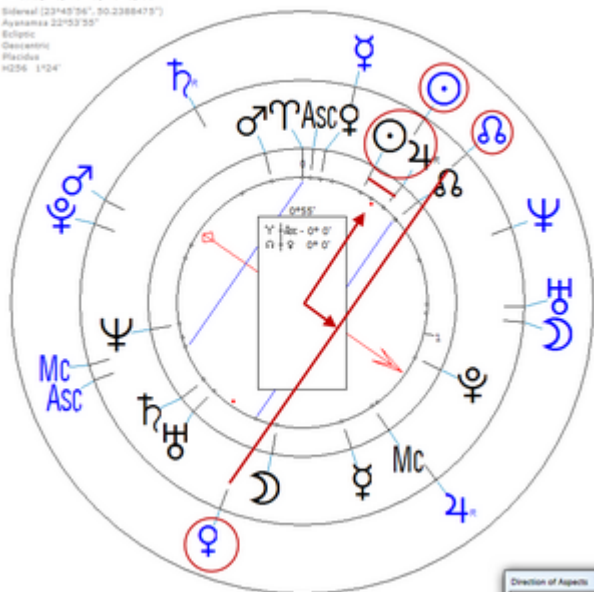

and second, the Lunar Sun with natal sun position exact and stands between Venus / Node.

An important event always occur, when progressed sun with natal sun forms exact harmonic.

"In May 2013, Wayne Turner sent more precise information by email: p. 14 of the November 1900 issue of 'Star of the Magi', it is actually as follows (written by Willis F. Whitehead): "Prof. Cunningham informs me that he visited Canton, Ohio, on September 30, 1896, and saw Mr. McKindley's mother, and she told him Mr. McKinley was born at half-past 11 as night.

The question whether the mother's time is LMT or LAT remains open, as until the mid 18th century many locations in the US used sundial based LAT. 11.30 pm LAT corresponds to 11:43 LMT."

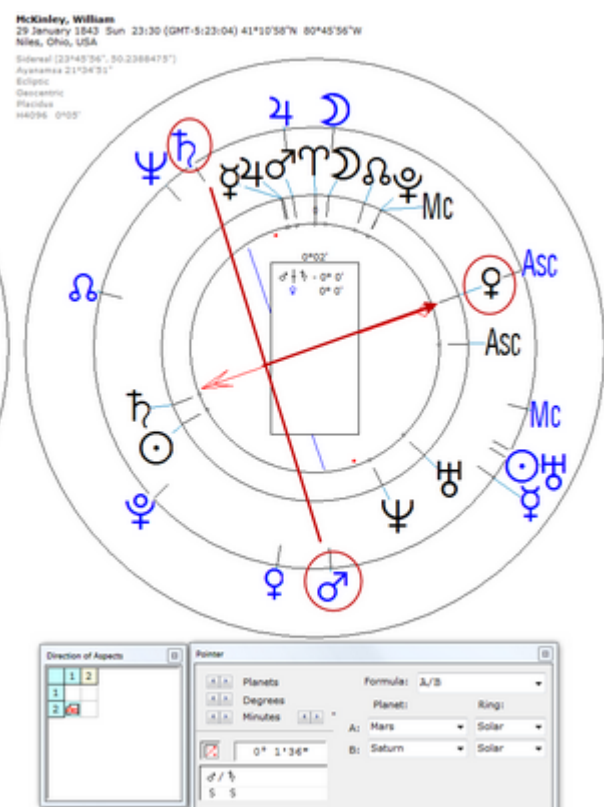

Because the discrepancy between two possible birth times is only 13 minutes, we use harmonic 4096 to find out if actual birth time is 11:30 pm. LMT or 11:43 pm LMT .

I show here only 11:30 pm. LMT, because this birth time shows the death of the wife.

Gabor, Zsa Zsa⁵¹

1-Autobiography, "My Story," gives the time. AP confirmed her birth date as February 6, 1917.

2-Another article in the L.A. Times, 1982, states, "Gabor released a copy of her Hungarian baptismal certificate that gives February 6, 1928."

3-A news clipping in 1989 reads, "Secretive about her age but court documents indicate she was born June 6, 1923"

Sometime earlier the date was claimed February 6, 1915. I do not remember where it was.

Only February 6, 1915 shows, why Zsa zsa Gabor divorced 7 times .

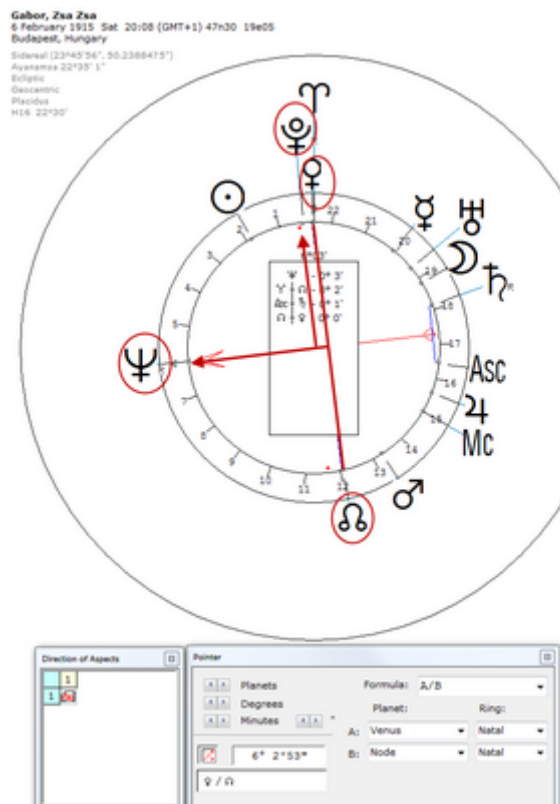

Because she only has divorce constellation with this date:

Birth time correction :

It is very important to know how correct the birth time is to be corrected.

1-If the time windows are a few minutes that we are supposed to correct , we should check it with harmonic 4096 and correct it to the minute. No matter how exact the event is, we must not start with harmonic 65536 right now. The events are only our landmarks but not exact correction time. We correct the birth time with progressions and returns but not with "exactly" established transit time. Because of exact transit time a few seconds could be wrong. Because we can not know it, we do not rely on transit time but on progressions and returns.

If the birth time is more than 5-10 minutes wrong (for example, quarter-hour indications), we should first correct with lower harmonic so that the birth time is correct until a couple of minutes, then we can fine tune with harmonic 4096.

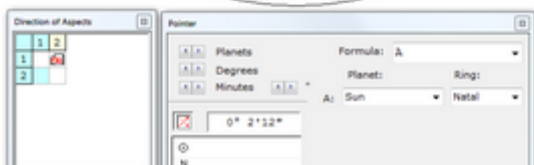

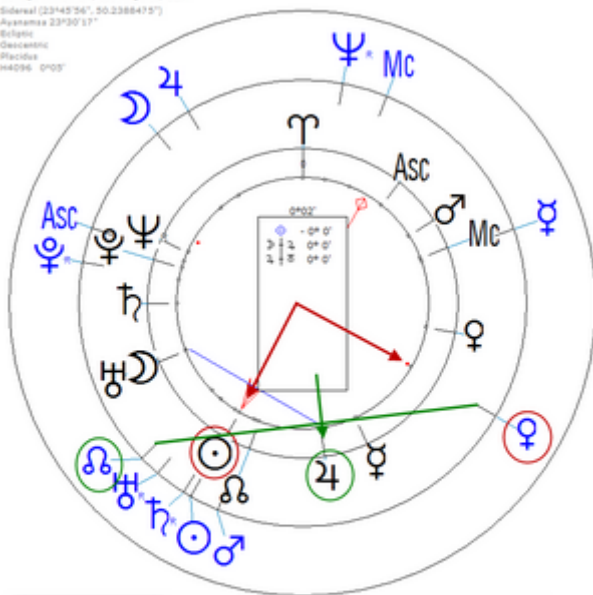

Only 1 " difference is acceptable. Not an orb would be, but if we divide the circle again and again to two, one second is lost.

Harmonic 4096 Solar Return

This birth time to the minute exact.

Because:

1- Solar ♀/♂ = Natal 4 and

Solar 4 = Natal ♀/♂

2- Solar ♀ = Natal ☉

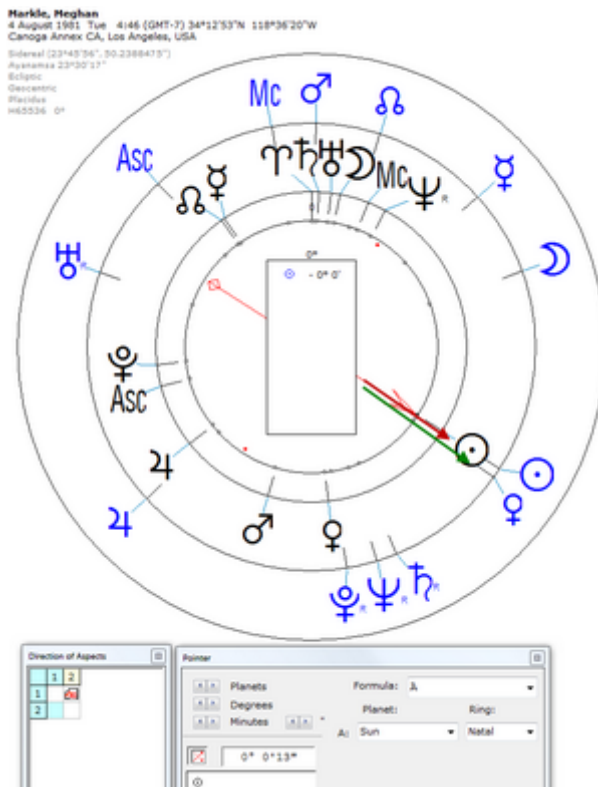

Seconds exactly

⁶⁶ https://www.astro.com/astro-databank/Meghan,_Duchess_of_Sussex

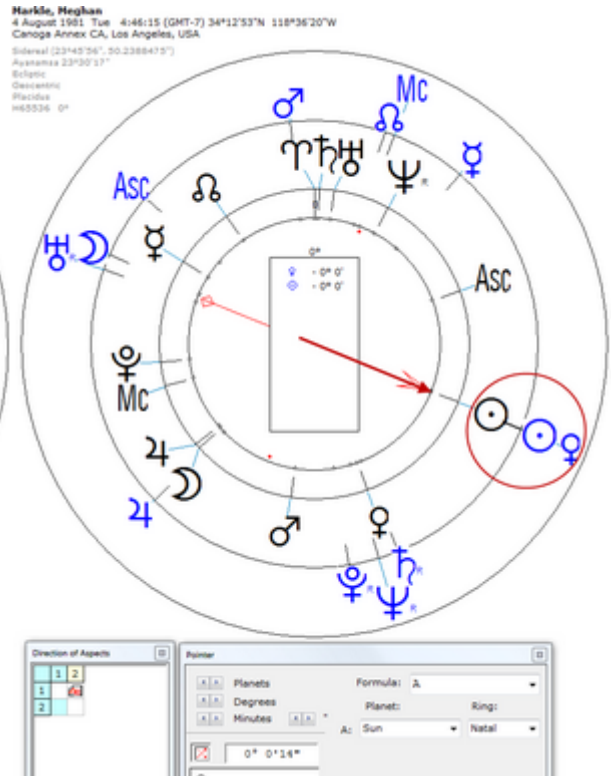

2- After we have determined that the birth time is accurate to the minute, then we go to Harmonic 16384 and/or 65536. Here we also use the Progressions, Lunar and Solar. Wenn event time is not accurate to the minute, we use at harmonic 65536 only Lunar and Solar. So one can, if one finds exact birth time, find out also exact event time.

Harmonic 65536

for birth time 04:46:00 AM

for birth time 04:46:15 AM

If we change the birth time 15", natal become natal Sun and Solar Venus exactly.

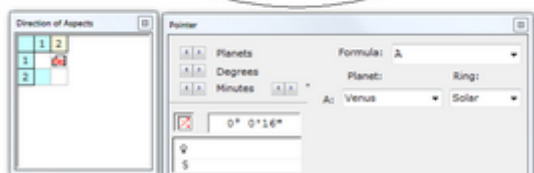

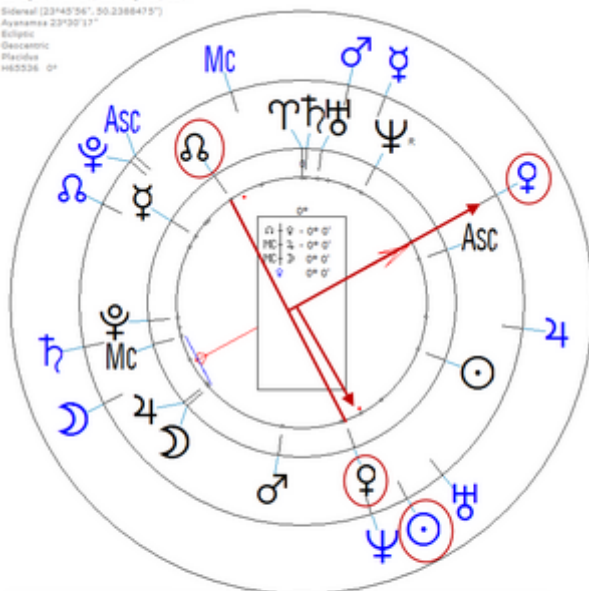

Now we control both options, whether 15 "correction was correct or not. Since the difference is only 15 "we use harmonic 65536 because we can not see the difference with smaller harmonics.

LMR rectified from mom's statement "after midnight."

The time window, which we must look for the correct birth time is at least 10-15 minutes, we look with harmonic 1024. We take the corrected birth time 00:27 and look at the marriage date with secondary and secondary progression. At secondary progression is the natal sun with secondary VE / MN axis and in secondary converse secondary sun with natal VE / MN not exact. If we take the corrected time back 20 minutes, they will be approximately exact. Since the first step is, we do not need exactly potions.

First, we control both birth times, which is the approximate time of birth. For this we use harmonic 1024, because first of all the birth times are not exact to the minute, secondly between both birth times there is about 2 hours difference.

Marriage 3 March 1991 (Sarah Ben-Arzi)

Here to correct the birth time we use harmonic 4096 because the correction will most likely be a few minutes.

For the birth time 11:45 the Lunar Venus / Node with the Natal Venus / Node are not quite exact. The difference is 2".

$$\text{Lunar } \text{♀} / \text{♋} = 0^\circ 4' 19'' - 0^\circ 2' 38'' = 0^\circ 1' 41''$$

$$\text{Natal } \text{♀} / \text{♋} = 0^\circ 1' 39''$$

If we correct the birth time to 11:41, the difference will be 0".

$$\text{Lunar } \text{♀} / \text{♋} = 0^\circ 4' 12'' - 0^\circ 2' 38'' = 0^\circ 1' 34''$$

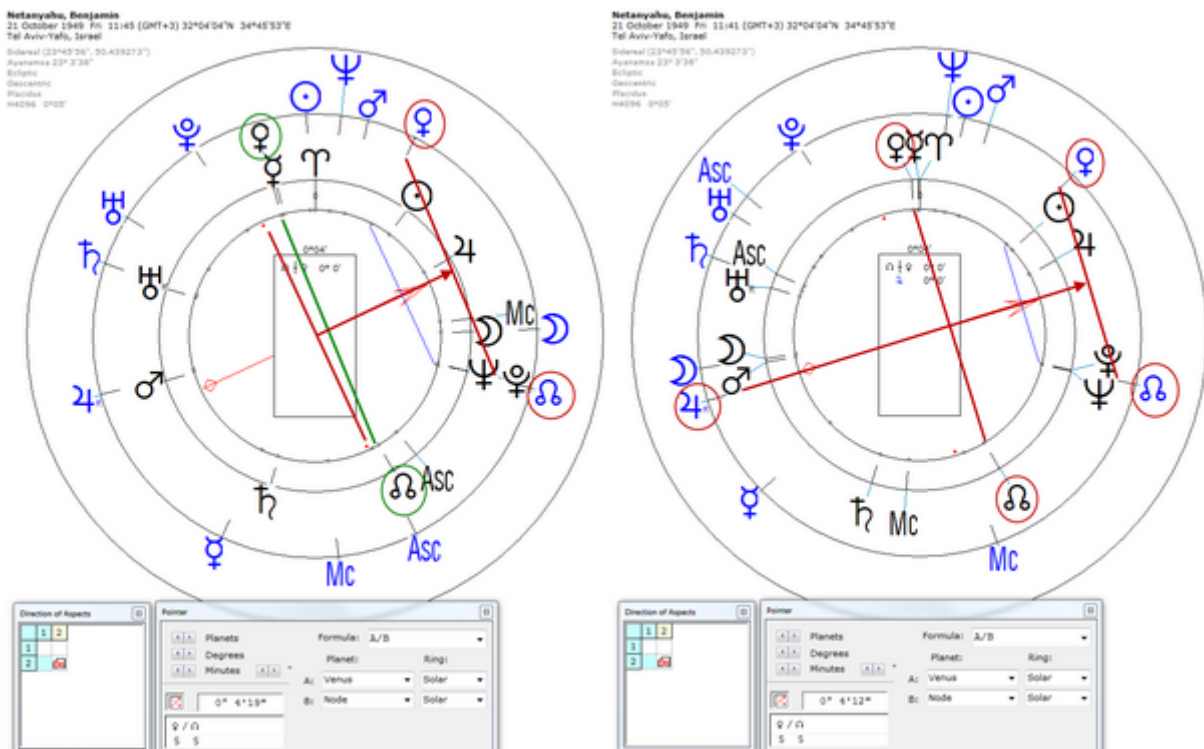

$$\text{Natal } \text{♀} / \text{♋} = 0^\circ 1' 34''$$

The birth time 11:41 also shows why he has married several times. He has with the birth time 11:41 in the natal planetary picture $\text{♀} / \text{♋} = \odot / \Psi$ shows will have multiple marriages. It is his third marriage.

Norwegian royalty, assuming the throne upon the death of his dad.

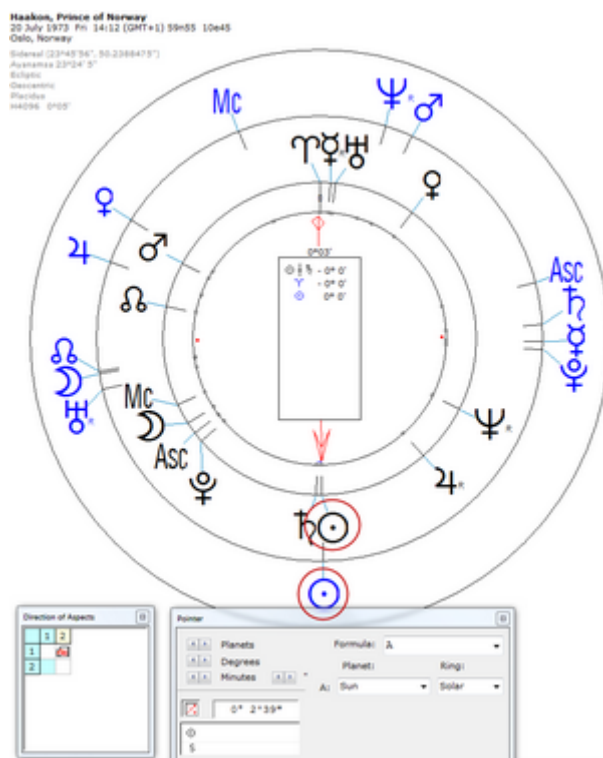

https://www.astro.com/astro-databank/Harald_V,_King_of_Norway

Here we would like to compare the sun of Harald V with a sun of his family member Haakon, Prince of Norway. But first we must be quite sure that the time of birth of Haakon is exactly accurate at least to the minute..

First, we control the birth time of Haakon, Prince of Norway.

Haakon, Prince of Norway⁸² married on 8/25/2001 in a fairy tale wedding at Oslo Cathedral, 5:00 PM with the completion of the ceremony ("I do") at 5:40 MEDT, letting loose a street party of perhaps 100,000 celebrants.

Secondary Converse Harmonic 4096

If we see the picture below, we know the birth time is accurate at least to the minute.

$p \text{ ♀} / p \text{ ♂} = P \text{ ☉} = \text{Natal } \text{♂}$
 $P \text{ ♀} = p \text{ 24} / p \text{ ♂} = \text{Natal } \text{♀} / \text{♂} = \text{Natal } \text{☉} / 24$
 $P \text{ ♂} = \text{Natal } 24$
 $P \text{ 24} = \text{Natal } \text{☉}$

⁸³ https://www.astro.com/astro-databank/Haakon,_Prince_of_Norway

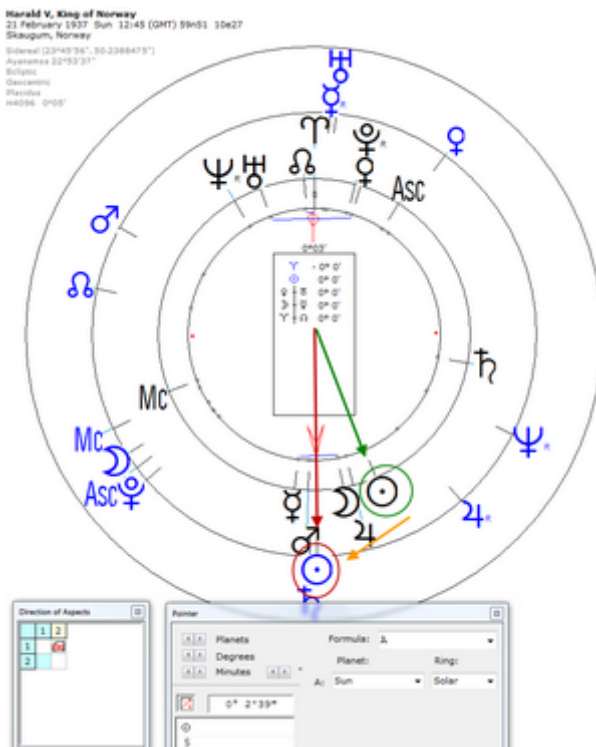

Since we know that the birth time is exactly correct to the minute, we can compare both birth times.

Sun comparison :

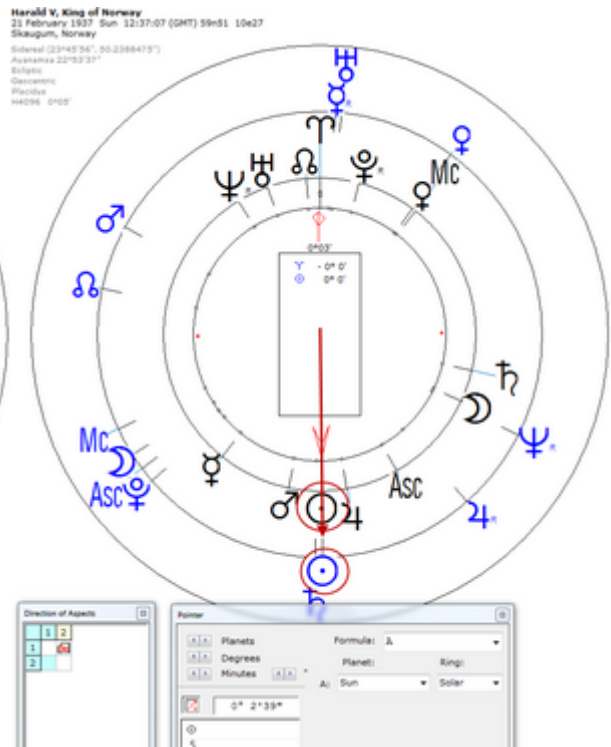

Harald V, King of Norway
Haakon, Prince of Norway

Harmonic 4096

Birth Time 12:45

Birth Time 12:37:07

The sun, which is to be corrected, is drawn in green. Because we do not yet know in which harmonic the suns must be exactly harmonic to each other, we take here harmonic 4096. Actually to be sure, we would have to compare the suns with harmonic 65536 also and check the options to find out which is the right one.

We get the time 12: 37: 07 with harmonic 4096, if we bring the sun to the position, which are exactly the two suns (picture right).

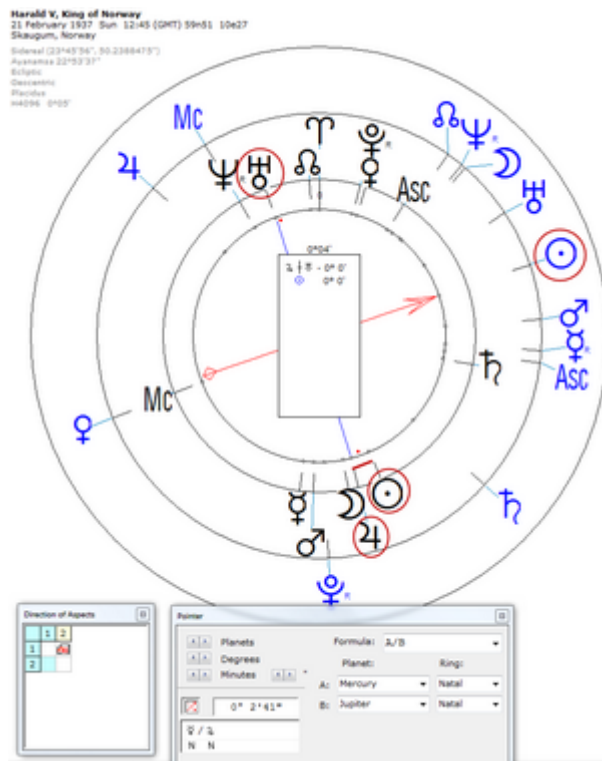

Now we have to control this time with events. If the corrected time does not coincide with the events, we need to come back to compare the suns with harmonic 65536 comparisons and new birth time options until we have found the right birth time.

We take as an event the birth of the son Haakon, Prince of Norway

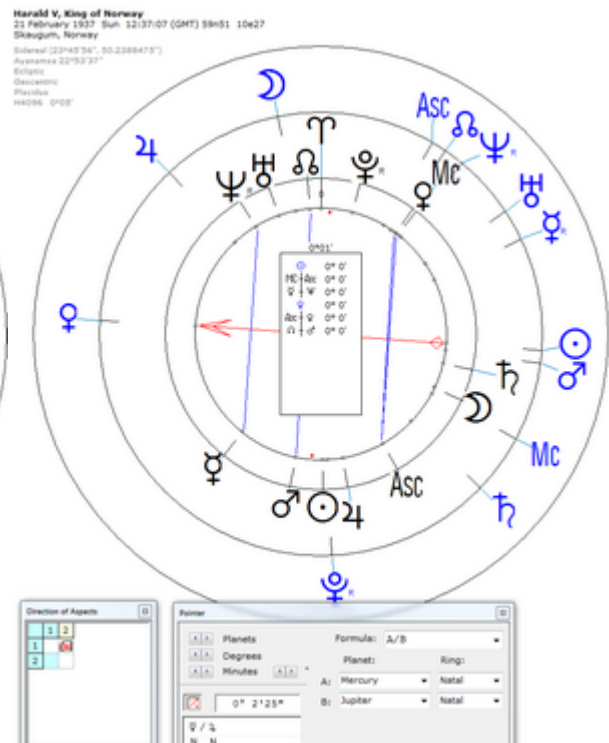

20 July 1973 at 14:12 (= 2:12 PM)Oslo, Norway

Secondary Converse Harmonic 4096

Birth Time 12:45

Birth Time 12:37:07

There are several reasons why the time of birth 12:45 is more correct than 12:37:07.

Birth time 12:45	Birth time 12:37:07
1- p ☉ = Natal ♄/♂ = Natal ☉/♄	1- p ☉ = Natal ♀/♂
2- p ♀ = Natal ♂ = Natal ♀/♂	2- p ♀ = Natal ☾/♀
3- p ♂ = Natal ♂ = Natal ♀/♂	3- p ♂ = Natal ☉/♀
4- p ♄/♂ = Natal ♄/♂	4- p ♄/♂ = Natal ♄/♂

The birth time 12:45 shows better the birth of a son (Mercury, Mars and Node connections) in a royal (Jupiter, Saturn) family.

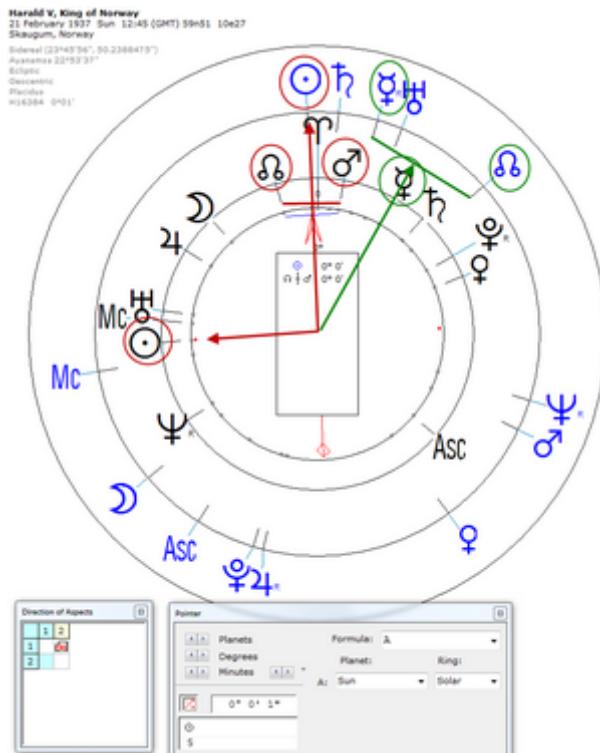

We compare the suns with harmonic 16384.

Sun comparison :

Harald V, King of Norway
Haakon, Prince of Norway

Harmonic 16384

Birth Time 12:45

This comparison shows that the birth time is exactly 12:45 accurate to the minute.

First, the suns are exact, secondly, that there is a male (Sun = Mars / Node) birth (Mercury/Node = Mercury, Mars / Jupiter = Mars / Jupiter).

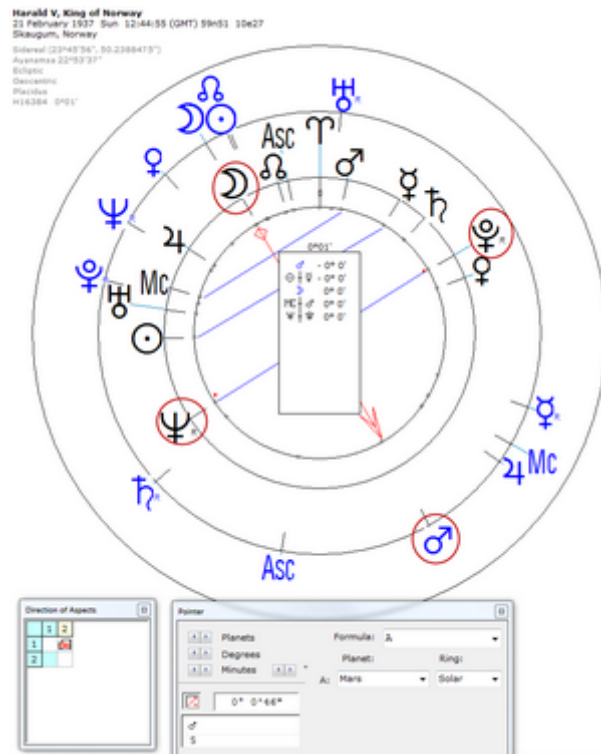

Princess Märtha of Sweden, mother of Harald V died of cancer at The National Hospital in Oslo in 5 April 1954.

If we take the birth time only 5 seconds back :

Here are examples of how to correct the birth time with the exact death time:

The correct birth time must be 08:29. It is not about a minute correction, but what should be taken care of in the correction.

If the birth time has been correctly corrected, it must be confirmed at each event.

How do we determine which of the event times is correct if more than one event time is given ?

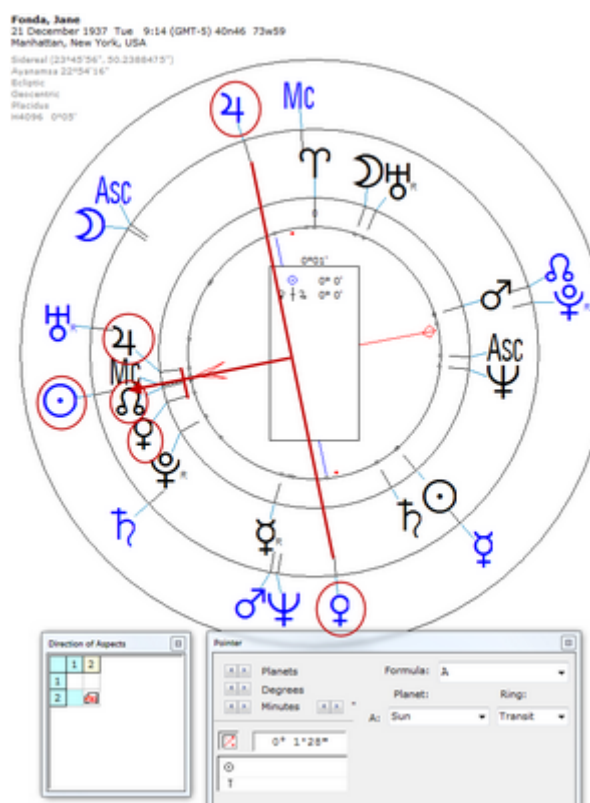

Let's take Jane Fonda's Marriage as an example. 21 December 1991 at 12:09 PM in Chicago, IL (Third marriage, Ted Turner). There is other time in astro.com page, which is also 11:22 AM as event time , which is very common in astro.com.

We take harmonic 4096 and compare progressive planetary positions with transit, tertiary, and minor progression. Since the most important planet in a radix is sun, we compare the sun positions for both times to see if a time better reflects the event. Of course, the birth time must be exactly accurate at least to the minute.

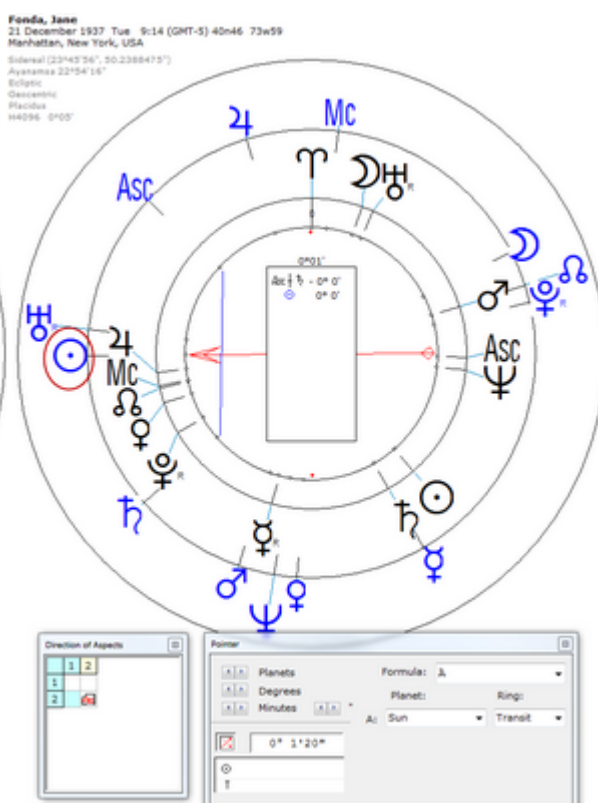

Now the question is, is it 12:09 PM or 11:22 AM?

Minor converse progression (Harmonic 4096)

Event time 11:22 AM

Event time 12:09 PM

	Event time 11:22 AM	Event time 12:09 PM
$p \odot = p \text{ ♀} / p \text{ ♄}$	= Natal ♀ / ♄ = Natal ♂	= -
$p \text{ ♀}$	= Natal ♄	= -
$p \text{ ♄}$	= Natal ♀	= -

Transit (Harmonic 4096)

Event time 11:22 AM

Event time 12:09 PM

	Event time 11:22 AM	Event time 12:09 PM
t ♀	= Natal ♀	= -
t ♀	= Natal ♀	= -
t ♀	= Natal ♀	= -

The correct event time must be 11:22 AM.
